

Michael,

I wanted to let you know how pleased we are with the performance of the AirField Systems AirDrain system that we have installed for Chesapeake Energy. Both the Car Park Rooftop and Building 14 installs are performing better than expected. We were able to achieve more than 6" of root growth in 100 plus degree weather during the first 5 weeks after the turf was installed on the Car Park Field. The perched water table provided by the AirDrain allows for extremely deep root growth and a strong healthy turf for the safety and performance of the athletes.

The AirDrain system installed quickly and easily. We staged the pallets per your instructions and installed the parts per your "AirDrain Proper Sequencing and Orientation Guide." We haven't had any rainouts or standing water on the field regardless of the size of the rain occurrences.

In closing, you have a fantastic product, with exceptional performance and value. See you in 3 weeks on our next project together.

Best Regards,

A handwritten signature in black ink that reads "Nathan Burks".
