

Comparative Data Sheet - AirPave vs. Geoblock

Feature	AirPave	Geoblock
Paver Material*	100% Recycled Copolymer with Impact Modifier	Up to 97% Recycled Polyethylene
Standard Size	32" x 32" x 1" (Palletized)	20" x 40" x 1.5" (grid)
Weight (lbs per part)	3.1	4.7lbs
Standard Color	Black	Black
Load Strength - installed sand filled	6747 psi	420 psi
Paver Flexibility	Flexible	Rigid
Soil Coverage at Surface - approx.	100%	87%
Root Area at Base of Unit - approx.	92%	47%
Fertilizer included with guaranteed analysis	Sustane Bolster	None
Cutting Tools for Installation	Pruning Shears	Heavy Duty Saw
Interlocking	Yes	Yes
Expansion and Contraction	Yes	No
Labor Skill Level Needed	1 Laborer	Multiple Laborers
Grass Installation Methods	All	All
Water Absorption (Freezing)	None	None
Oil Absorption	None	None
Affects from Turf Chemicals	None	None
Heat Absorption	None	None
Estimated System Install Time per 1,000 sqft.	3.1 hr Full System	No Data Given
